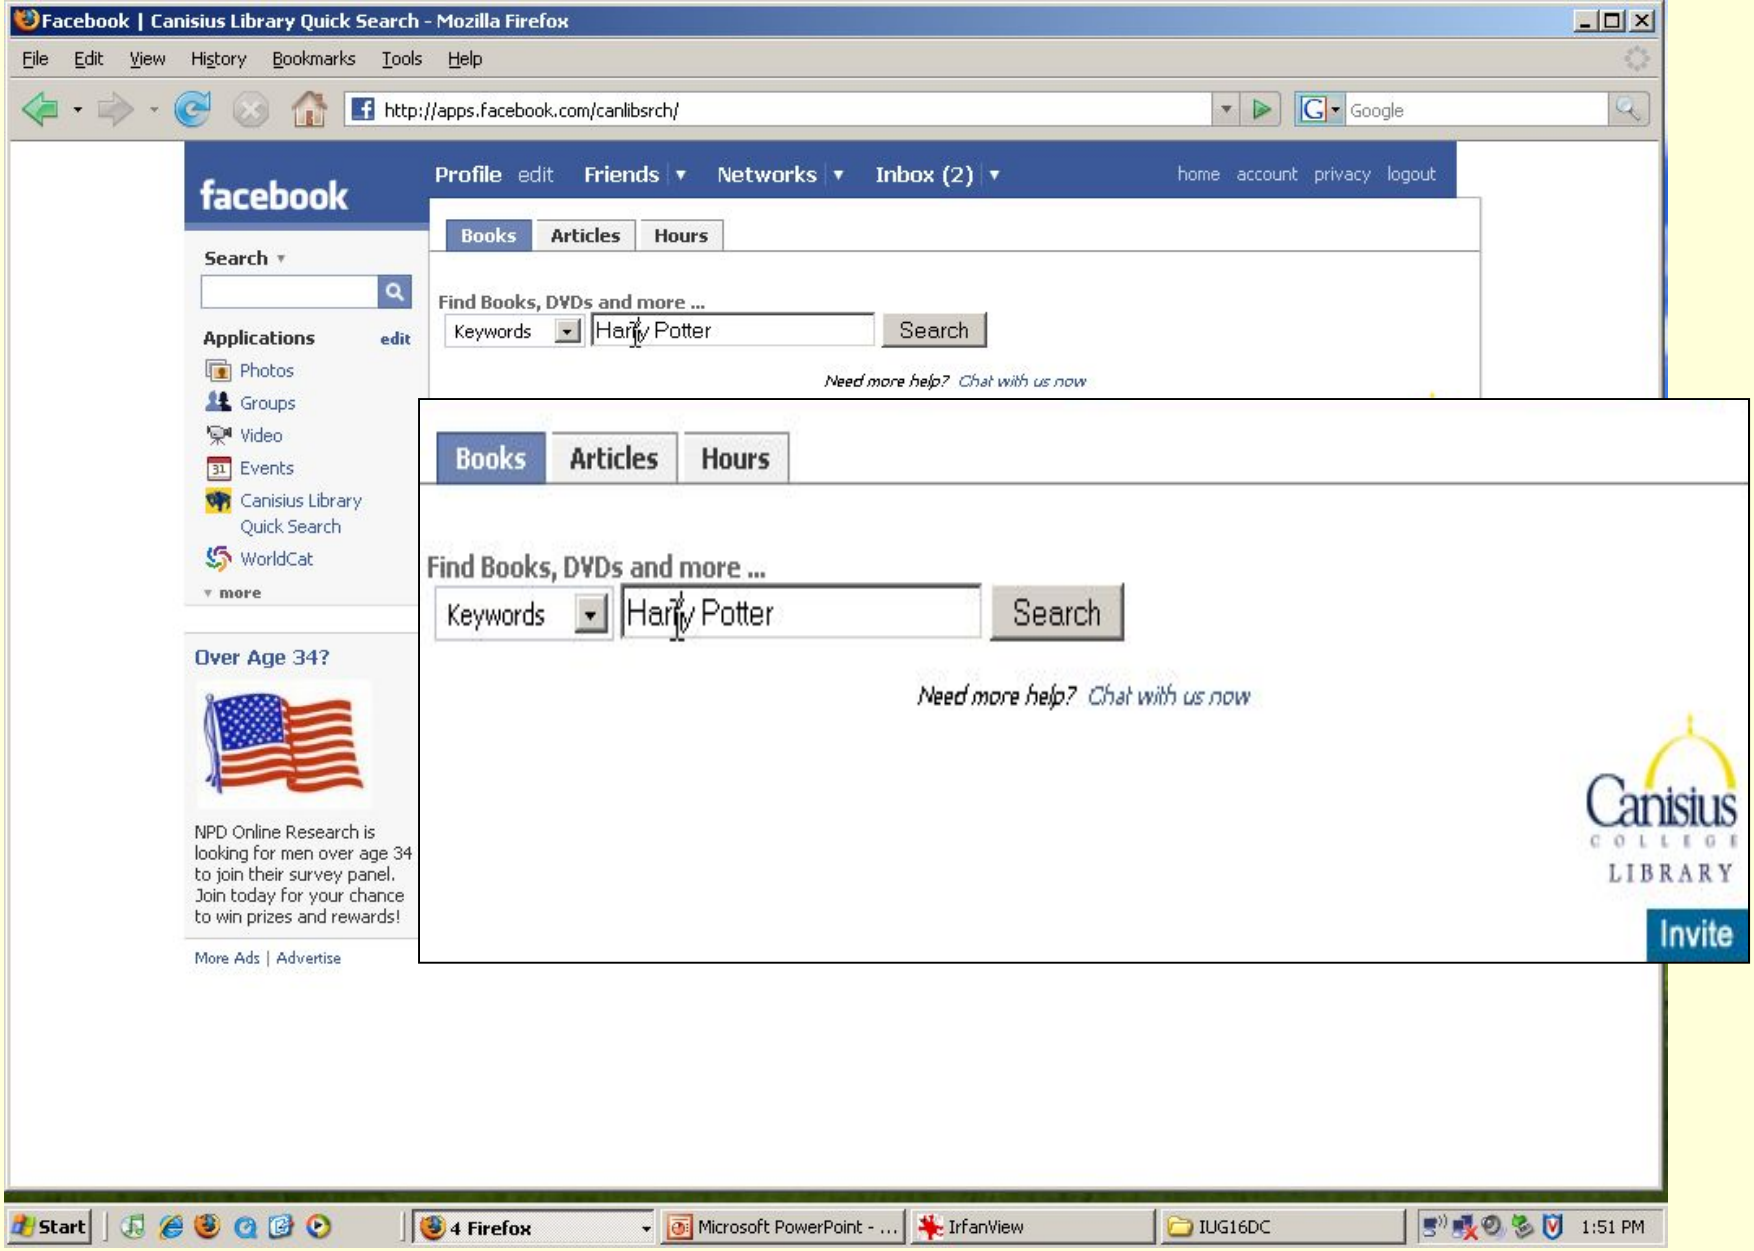
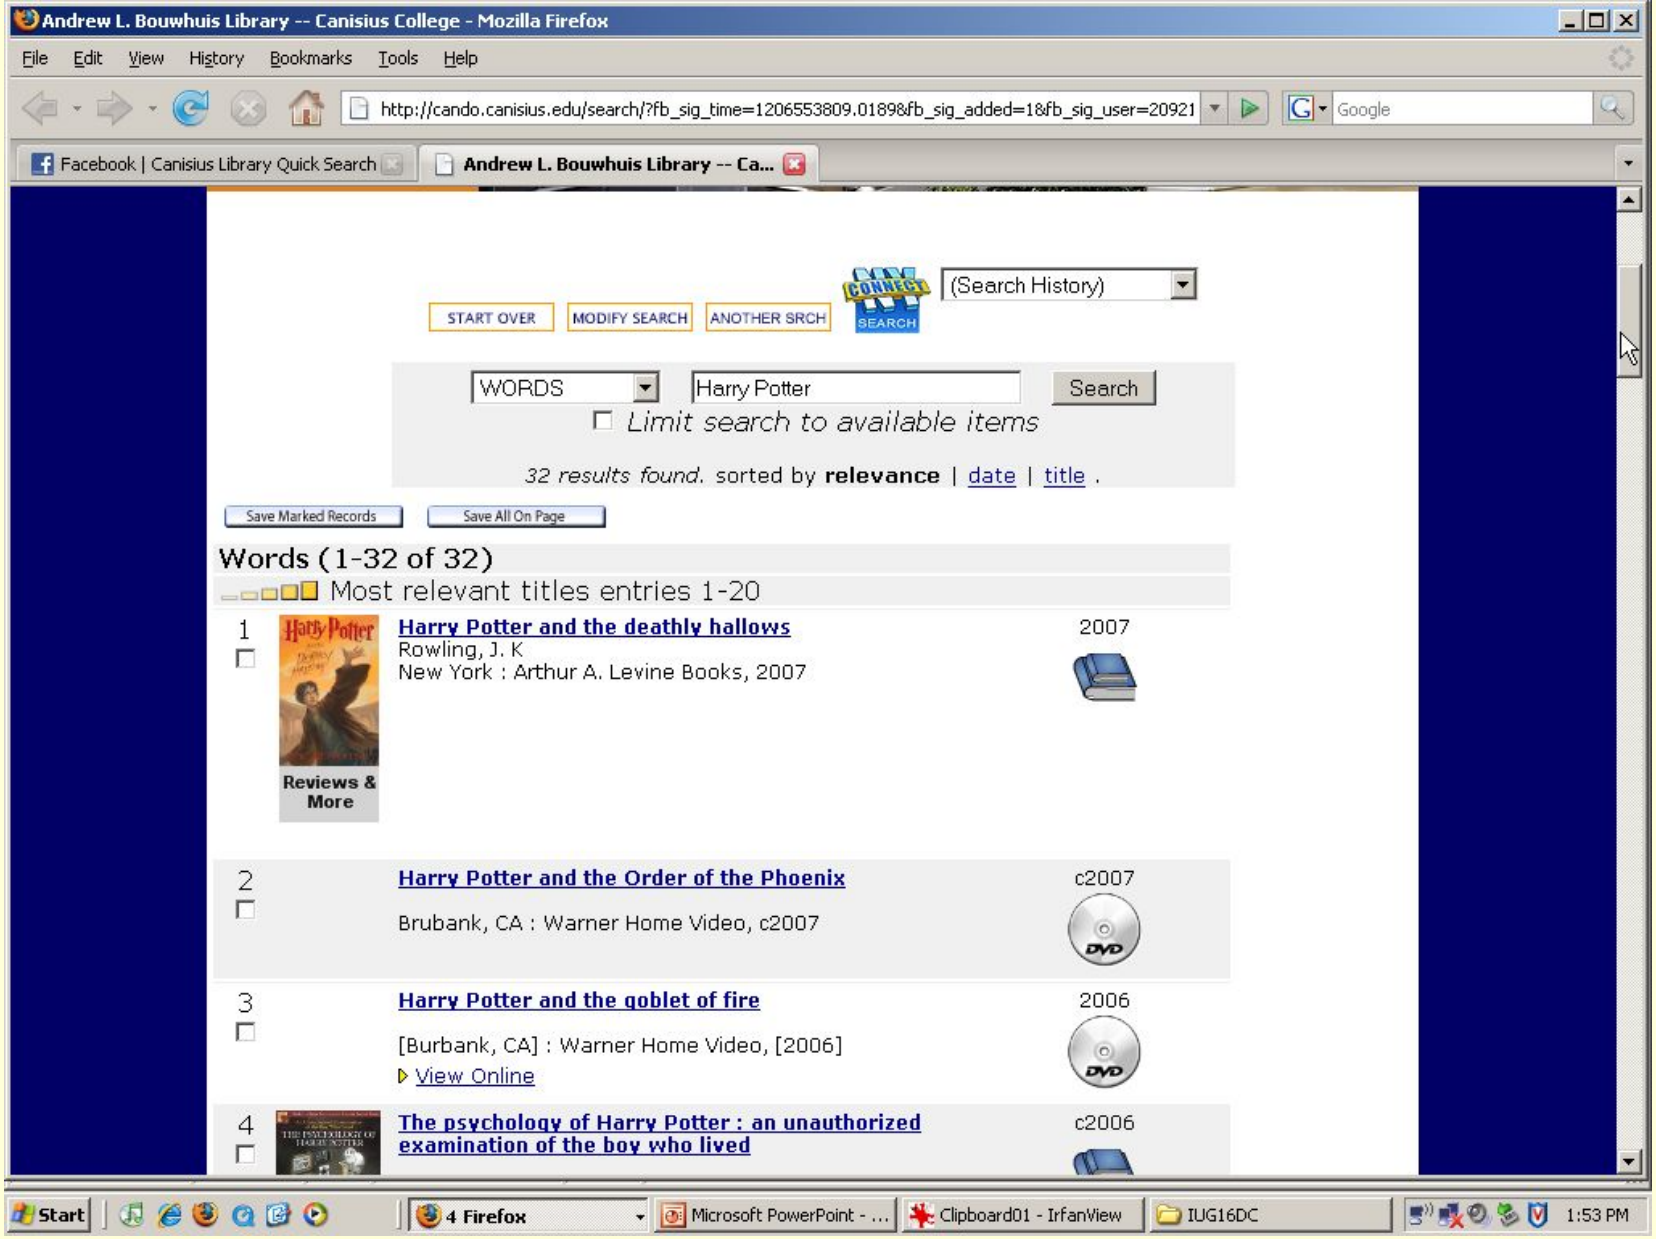
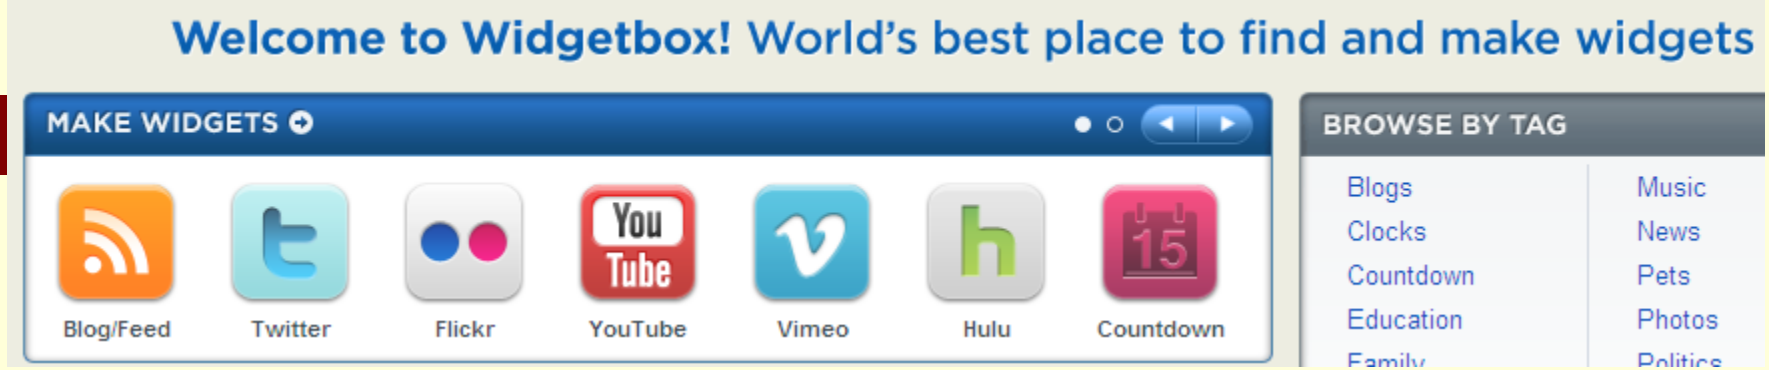
Integrate your WebPAC with Facebook



Integrate your WebPAC with Facebook



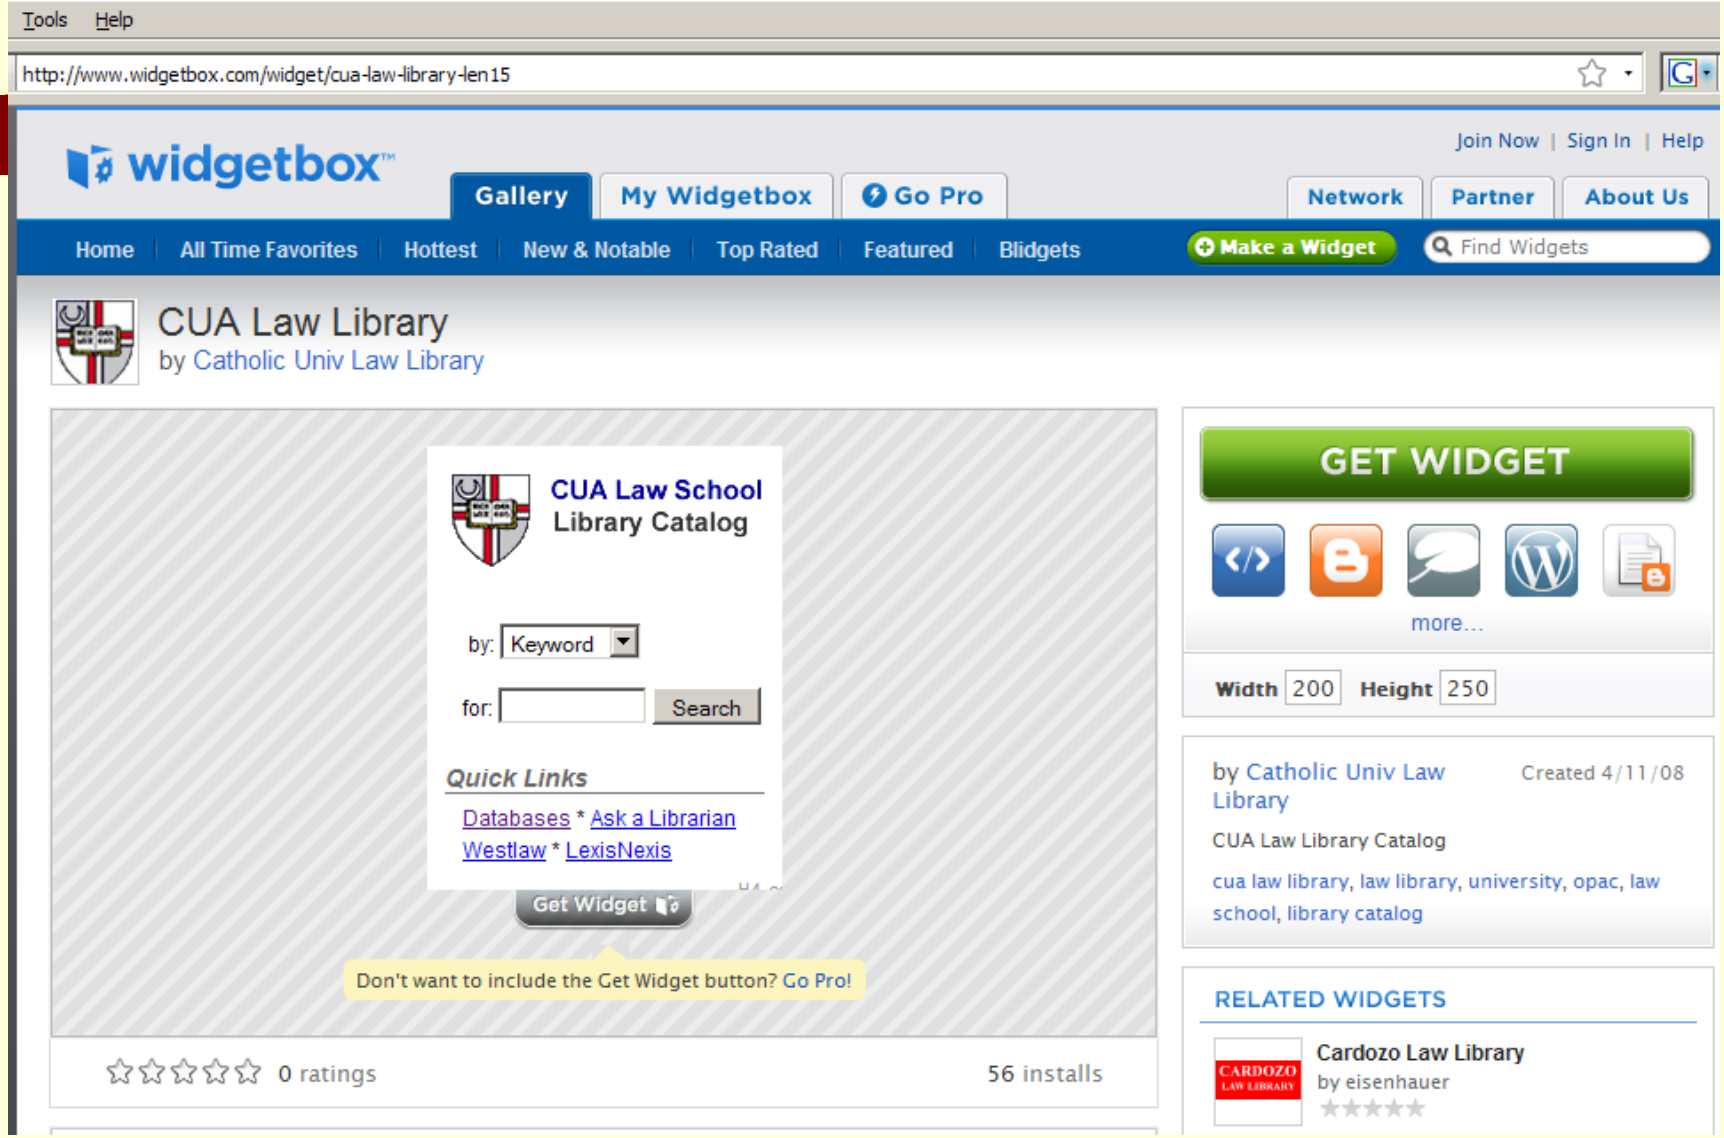
Integrate your WebPAC with Facebook



- **Widgetbox.com**
- **Set up one widget and the site produces code for you to put in many different places.**

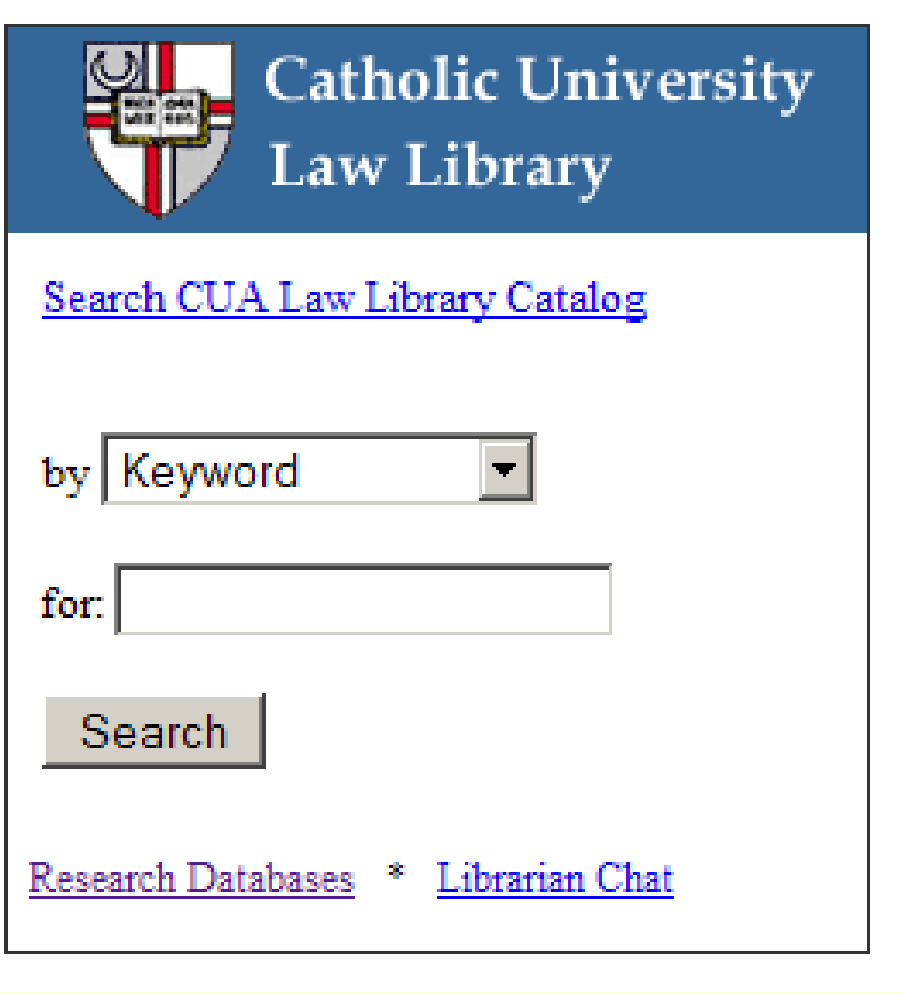
- **Len Davidson**
  Catholic University

- **http://innovativeusers.org/iug_clearinghouse-app/index.php?qfdo=Full+Record&id=191**



Widgetbox gives you an area to create a box and then it'll let you export it to other applicatiions.

Widgetbox.com



The finished box. The admin module gives you the ability to create widgets of code to cut and paste into a lot of different web 2.0 sites to generate this search box.

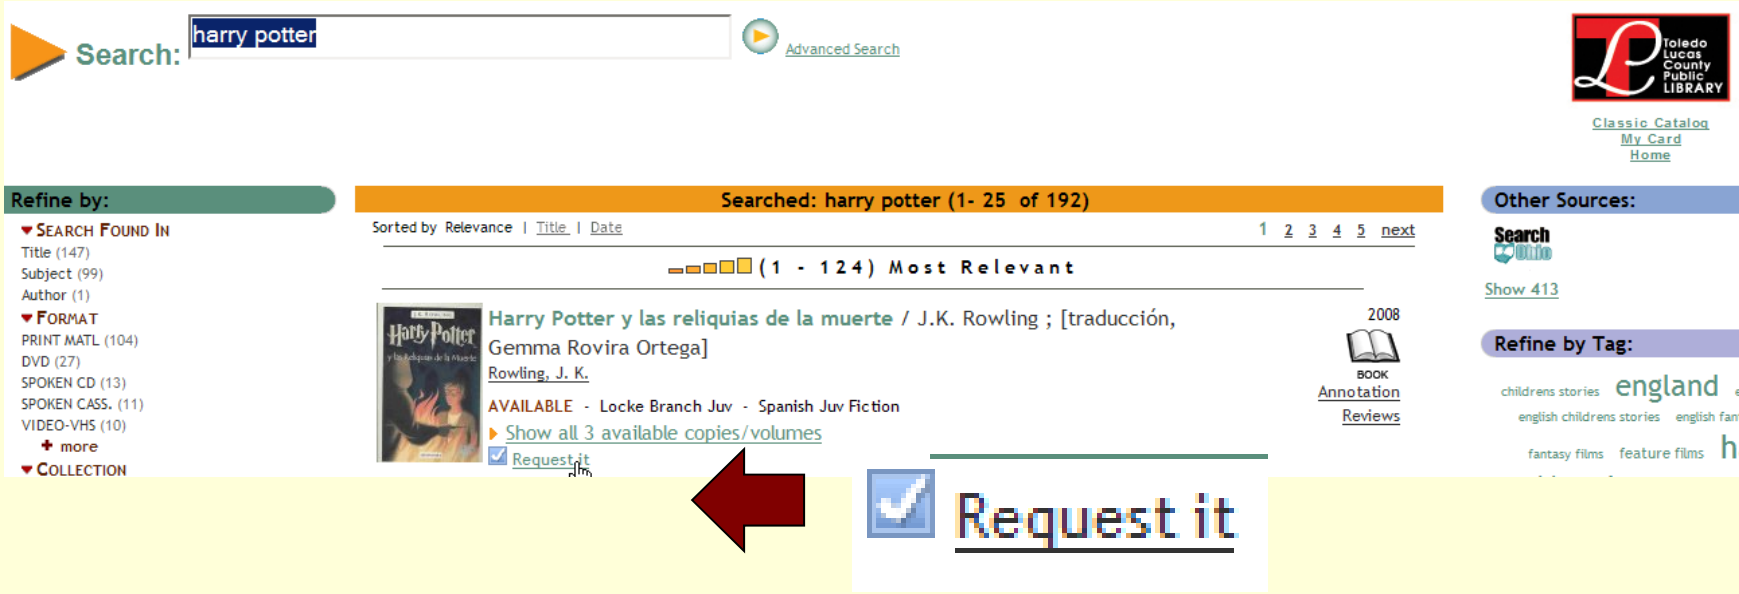
Text Message Notices for
Pickup/Hold/Overdue Notices
and other patron messages from the system.

http://www.velti.com

Donna Spychala
Toledo Lucas County Public Library
Donna.spychala@toledolibrary.org



Request it like normal, and you get a text message instead of an email.

Modify Patron Information

Please enter new information and press Submit.

Your Choice **- E-mail or Text message:**

- **Contact me by e-mail:**
  Enter your email in the box below
- **Contact me by text messaging:**
  Enter your text message address in the box below
  phonenumber@text.toledolibrary.org
  Example 4195554444@text.toledolibrary.org

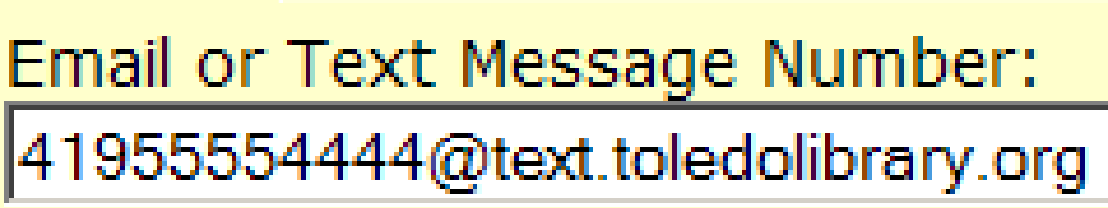
  Note: The library does not charge for this service.
  Charges from your messaging provider may apply.

Email or Text Message Number:
41955554444@text.toledolibrary.org

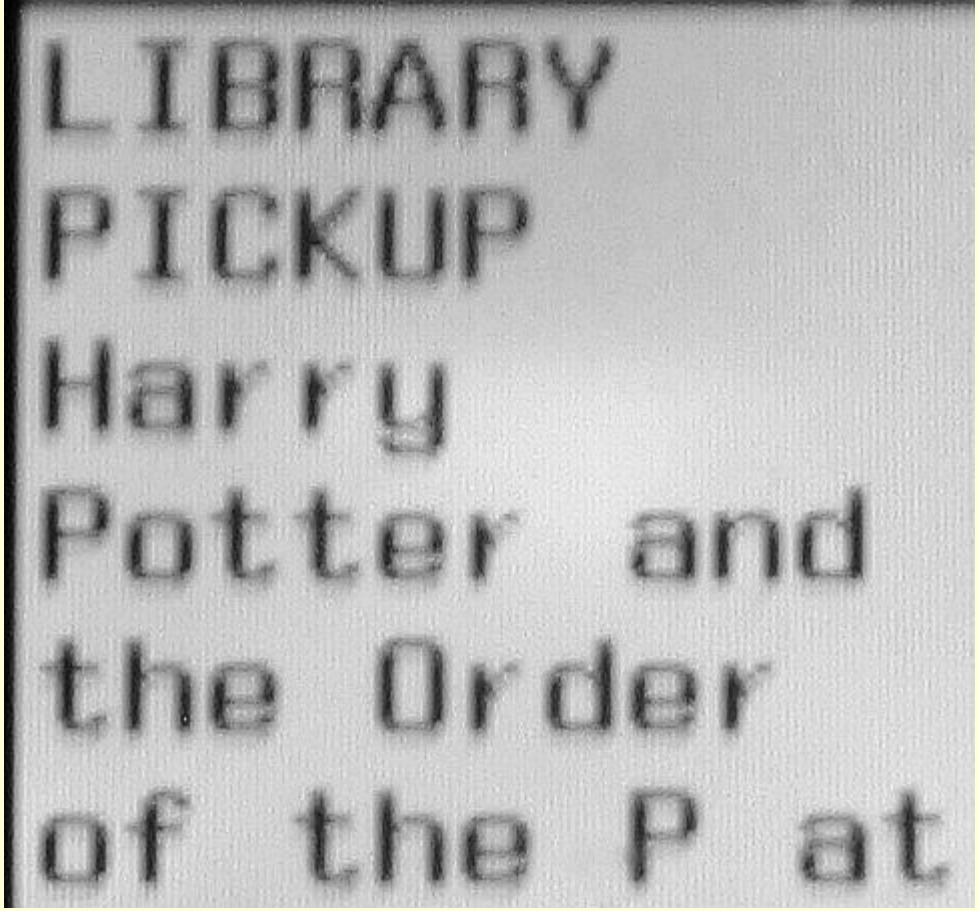
All messages, reserves, and notices will be s
address.

Home Library / Default Pick-up Location (for Requested Materials):
Waterville Branch

Submit Cancel



Patrons have to modify their email address so that an email goes to vendor and Velti changes it over to text and sends message!



Toledo Lucas County Public Library had about 800 patrons sign up in the last year.

The vendor discontinued the service at the end of May in 2009.

Innovative Product: 305SMS SMS Text Messaging

Innovative product, will enable libraries to supplement regular notice production with new SMS Hold Pickup Notices. In addition, this new product will be hosted by Innovative at one of its secure hosting facilities. This means that libraries do not need to have individual accounts with SMS message providers and can be implemented without using precious staff resources. SMS Test Messages are unlimited in number, ensuring that the Library never runs out of messages.

SMS hold pickup notices will be sent frequently during the day so they will be delivered in a timely fashion, at times within the hour of an item's availability. This supplemental service does not replace regular production of hold pickup notices; these notices are still sent in the prescribed manner to patrons.

Hold pickup notices will likely be followed by courtesy notices.

Hold pickup notices are delivered as SMS messages to patrons' mobile phones and text message devices. Staff can customize the text of each notice type. A new field in patron records identifies the mobile phone number to receive the message. Patrons and staff can specify SMS notice as the preference for receiving hold pickup notices.

Google Books

Get others code:

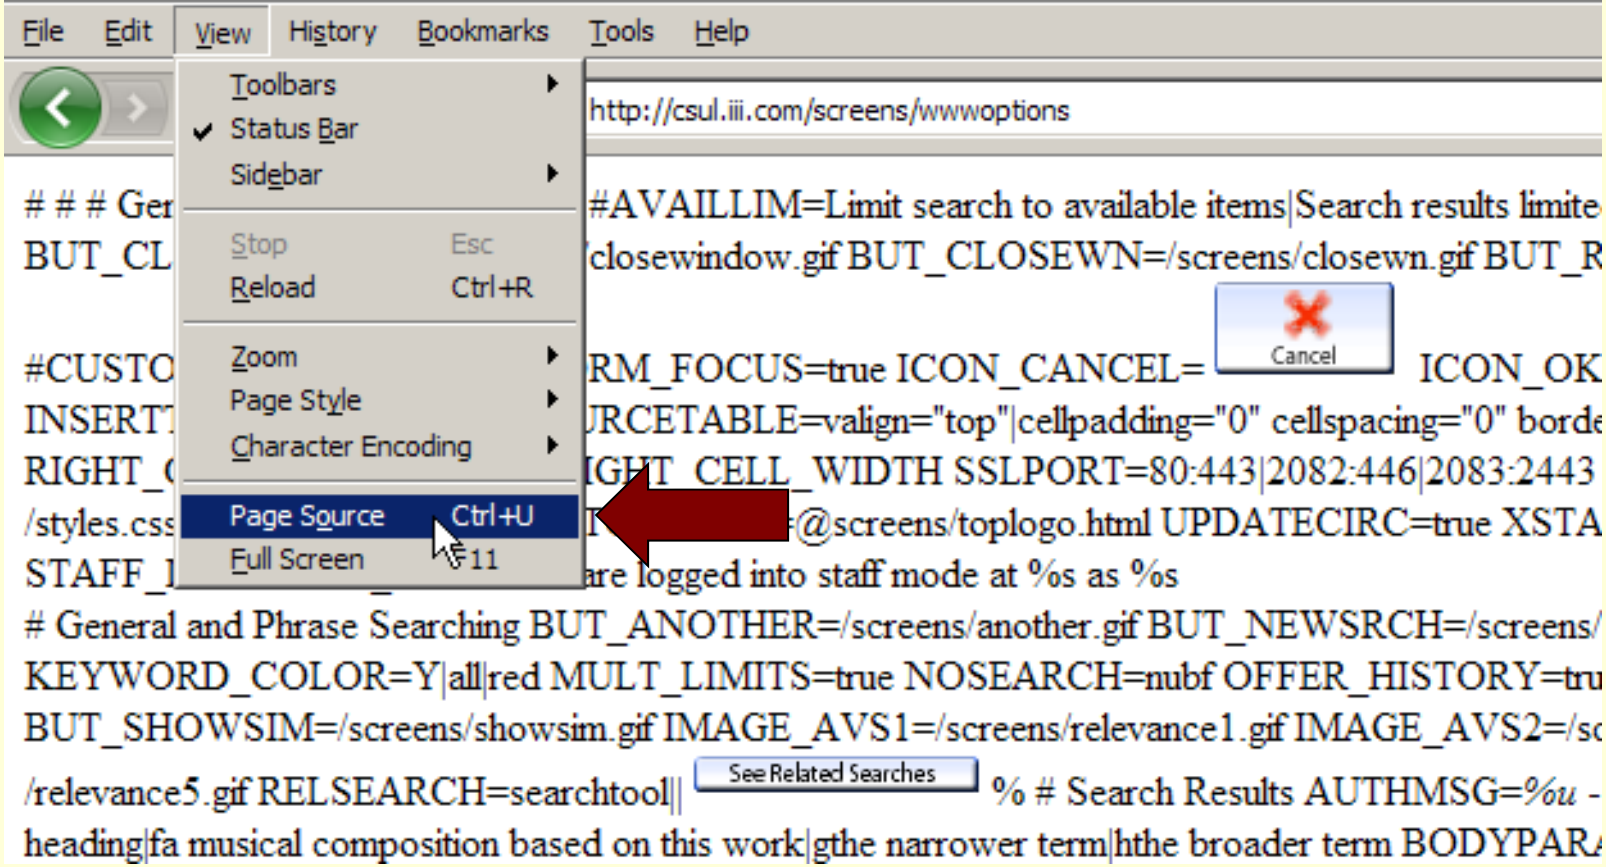
Use Firefox to view page source

I.E. can but not as neat.

Get the code. Point at the urls:
Google Books info just covered on pages:
http://csul.com/screens/bib_display.html
http://csul.com/screens/briefcit.html
http://csul.com/screens/botlogo.html

Other useful pages to look at others screens:
http://csul.com/screens/wwwoptions
http://csul.com/screens/styles.css

Then view page source in Firefox, and you have a notepad like page with their source page.



You get a giant run on screen.

Now View page source.

</script>
```

OCLC Cite This

TroubleShooting:
) Your oclc number is not displaying in your bibdisplay.html, you may want to try and display that.

http://library.ccbcmd.edu:2082/search~S4?/Yharry+potter&searchscope=4&SO

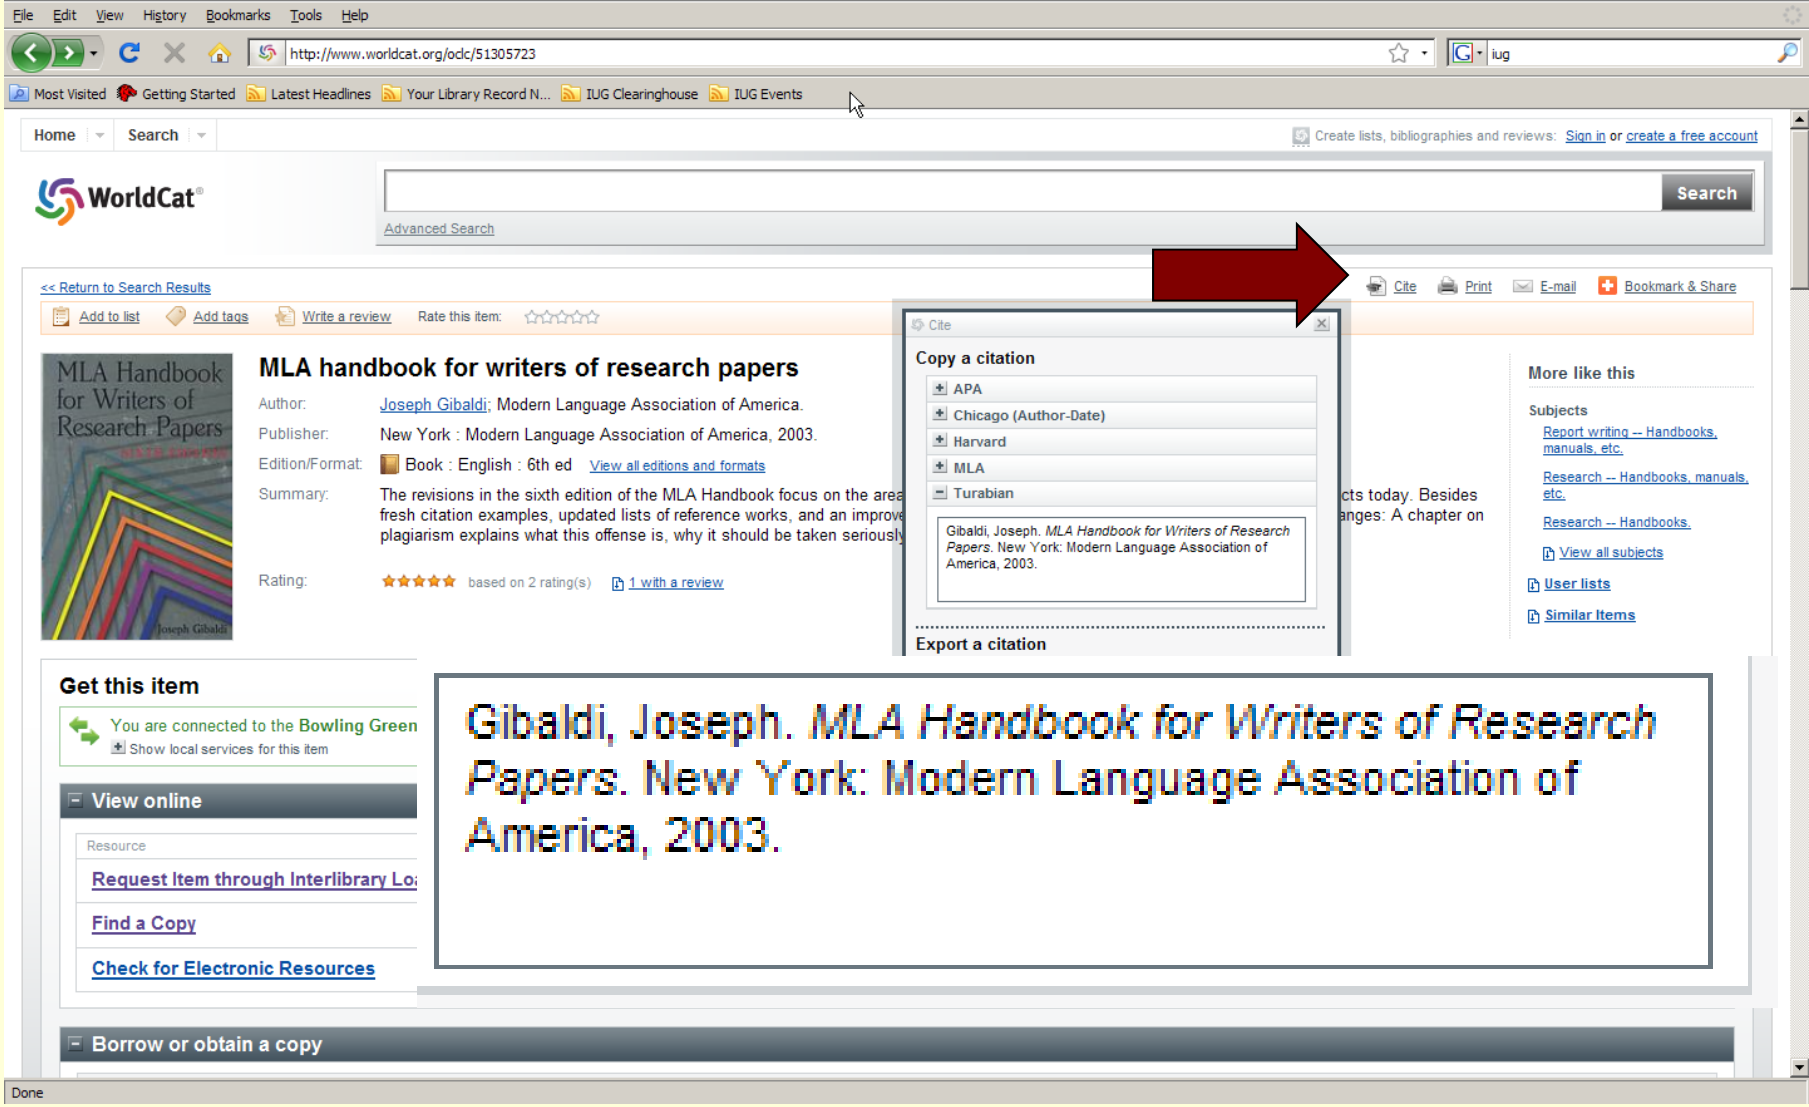
RT=D/Yharry+potter&searchscope=4&SORT=D&SUBKEY=harry%20potter/1%2C24%2C2
4%2CB/frameset&FF=Yharry+potter&searchscope=4&SORT=D&1%2C1%2C
I think your bib_display.html file needs to have something added:
I'd probably add something to the bibdisplay.html in these lines:

<!--{recordlink}-->
<!--{recordinfo:#}-->

To control what exact fields display in my full details section I use the following.
<!--{recordinfo:crenwi}-->
<!--{recordinfo:asdbuxz}-->
whereby the letters after the recordinfo: stand for the tags of the
data.
I don't have a way to tell what tag is used for your oclc number, but you'll need to get the oclc number to display.
2) Try changing the webpub.def to the way mine is below.
If your webpub.def tells system to display oclc # as follows
b|o|001|OCLC #|b|
mine reads like:
b|o|001|&|OCLC #||b|

For some reason the OCLC citation creator does not include the edition information in the citation. This led to improper citations so we took it down

OCLC has a new way:
http://www.worldcat.org/oclc/51305723



Yet the OCLC Cite this still doesn't include the edition information!

For the catalog redesign they started by wanting to make the start simple like Google.

Worked with an artist who had no preconceived notion of what the catalog should look like.
The artist drew up the design first.

Dave had to convert the graphic design and convert to html. He used jquery – javascript library to control display of information on web page and to manipulate the tabs.

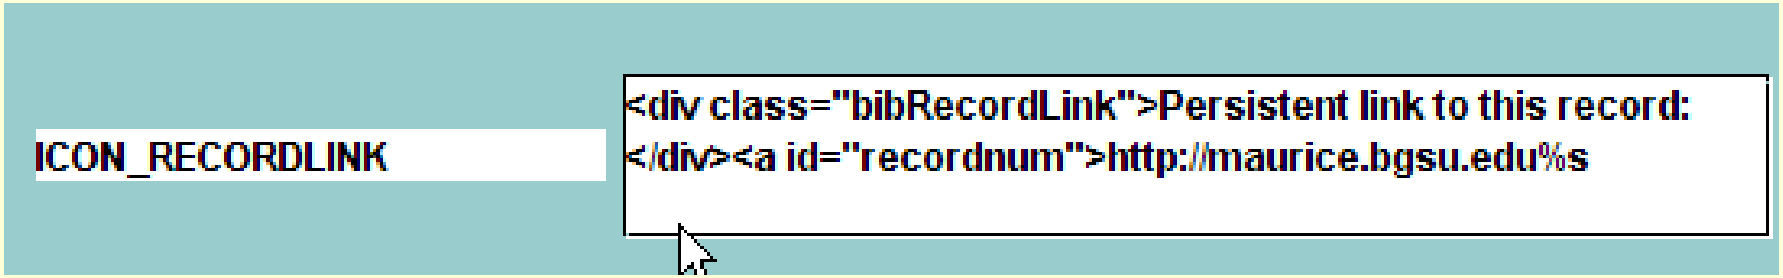
Bib_display.html

Persistent link to this record: http://maurice.bgsu.edu/record=b2975953~S0

A lot of people ask me about this full url display BGSU has. How to achieve this effect!

http://maurice.bgsu.edu/record=b2975953



** Persistent link to this record: <a id="recordnum">http://maurice.bgsu.edu%s**

From my styles.css file:

.bibRecordLink {width: 180px; font-size:75%; text-align: right; margin-left: 7px; padding-left: 0em; padding-right: 1em; background-color: #E0E0E0; font-weight: bold; font-style: italic; float:left;} #recordnum {margin-left:5px; background-color: #ffffff; font-weight: bold; font-style: italic; font-size:75%}

Andrew Welch, Aurora Public Library
Bob Duncan, Lafayette College
